January 4, 2008

Jeanne M. Ottinger, RN., Esq.
Montgomery County Coroner

TOXICOLOGY REPORT IN THE CASE OF:

ZACHRY, Raymond (47/C/M)
MCC No: 2007 - 1316
DrugScan Accession No: 07180598
DrugScan Control No: 164201

EXAMINATION: Undefined toxicological causes (general unknown).

HISTORY: Pending toxicology; chronic sinusitis and multiple Rx.

SPECIMENS: 4 sealed labeled containers – 2 with BLOOD, and 1 each with BILE VITREOUS FLUID were received December 17, 2007.

FINDINGS and COMMENTS:

BARIUM:

41 micrograms/L BLOOD

Normal levels:	80 – 400	µg/L
Occupational exposure:	17 – 25	µg/L
Non-fatal poisoning:	260 – 7800	µg/L
Fatal poisoning:	1900 – 9900	µg/L

ANALYSIS SUMMARY:

1. No alcohols (including ethyl alcohol) or other volatile intoxicants were detected by headspace gas chromatography.
2. No toxicologically significant kinds or levels of opiates and synthetic morphine substitutes, barbiturates, non-barbiturate hypnotics, other extractable organic depressants, cocaine, amphetamine, other stimulants, cannabinoids-marijuana, or phencyclidine (PCP) were detected in the specimens by immunochemical assay and gas chromatography/mass spectrometry.

Mark R. Lichtenwalner, Ph.D., DFTCB
Assistant Director
